SUBJECT: Technology Plan Approval Requirements

Your technology plan has been referred to E-Rate Central for review. Under the FCC/SLD rules, technology plan approval for E-rate purposes requires that the plan adequately address five core requirements. As shown below, our review indicates that your plan includes all five elements. We are recommending to NYSED that your plan be approved with an approval expiration date of June 30, 2017. You will receive a NYSED approval letter under separate cover.

Although the basic structure of your technology plan has been approved, you are reminded that E-rate rules require a level of consistency between technology plans and E-rate funding requests that was not a part of our review process and remains your responsibility.

Important: Retain this memorandum and the NYSED approval letter as documentation of your plan's approval, the date of the approval, and the date on which the approval expires.
